

Homework 4 Bonus Exercice

During the main event of NFT Paris Week 2024, I experienced many unique and wonderful moments. Among them, it was particularly unforgettable to communicate with the Muse Frame team.

Muse Frame is a platform that combines art and technology. They use NFT to redefine the way of art collection and art display.

I learned from them that through NFT technology, artworks can not only be stored digitally, but also ensure the uniqueness and copyright ownership of each work. It can greatly increase the collection value and market liquidity of artworks.

What is even more exciting is that Muse Frame has also explored new models that combine physical artworks with digital NFTs. It can create a new interactive experience for artists and collectors.

This exchange gave me a deeper understanding of the application and potential of NFT in the art field.
